Canon EF Lens Full Time Manual Focus Override. I often use the lens full time manual focus override function on my Canon USM zoom lens when doing close-up photography with the Canon EOS 6D / Canon EF 70-300mm f/4-5.6L IS USM lens (without a tripod). Full time manual focus override is a lens focusing function for fine-tuning focus while in camera / lens Autofocus mode.

~~Canon EF Lens Full Time Manual Focus Override~~

To manually focus the lens, follow these steps: Move the Focus switch to MF. On most lenses, you'll find this switch on the left side when the camera is facing your subject. Press the viewfinder to your eye and twist the lens focus ring until your subject is in clear focus.

~~How to Manually Focus Your Canon EOS 6D - dummies~~

Canon Full Time Manual Focus Canon Full Time Manual Focus Override Full time manual focus override is a lens focusing function for fine-tuning focus while in camera / lens Autofocus mode. Its not always possible in the field (without a tripod) to go manual focus when doing close-up photography - for this purpose I gently turn / fine-tune the

~~Canon Full Time Manual Focus - old.dawnclinic.org~~

Sounds simple--and it is. A Canon lens without FTM, you will have to switch to MANUAL mode from AUTO before you attempt to turn the focusing ring yourself, or you will risk breaking it. The...

~~What does it mean "allows full-time manual focus"? | Yahoo ...~~

Canon's own EF Lens Work III has this to say about full-time manual focusing: Full-time mechanical manual focusing This function allows the photographer to manually focus the lens as soon as one-shot AF control is completed without switching the focus mode switch to manual focus.

~~Some Thoughts on Electronic Focusing and Full-Time Manual ...~~

The manual focus on the EF70-300/4-5.6 IS USM isn't fun to use. It's underdamped and there's some play in it. It's usable, but it's not as nice and smooth as MF on a lens which does have FTMF. It's not that it doesn't have FTMF, it's more that MF is a little sloppy.

~~Full time manual focus...do I need it? | Photo.net ...~~

In One Shot AF mode, if you half-press the shutter release, thus causing AF to operate, and keep the shutter release half-pressed, you can fine-tune focus on an FTM lens and then press the release fully. In my experience this is of limited value.

~~Canon Full Time Manual Focus - download.truyenyy.com~~

You'll feel the drag of the clutch as it lets the ring slip, but it wont hurt anything. In the past Canon has sold many "USM" lenses that do NOT support full-time Manual focus. The Canon EF 70-300mm f/4-5.6 IS USM is one example still being sold. This lens can be damaged by turning the focus ring while in AF mode.

Full-time manual focusing Full-time manual focus override is another benefit of shooting with Canon EF lenses. As accurate as Canon AF systems are, there are times you want to tweak the focus for one reason or another. With most Canon lenses, changing focus on the fly is simply a matter of rotating the manual focus ring.

~~Canon DSLR Lens Buying Guide | B&H Explora~~
z Quickly turning the focusing ring may result in delayed focus. z The lens' focusing ring is electronic. z W hen AF operation is set to [ONE SHOT], manual focus is possible after autofocusing has been completed by continuing to press the shutter button halfway. (Full-time manual focus) However, the camera settings need to be changed.
