P0740 is one of the most common transmission trouble codes. It means that the CL 's computer has detected that there is an issue with the torque converter clutch (TCC) solenoid circuit. The TCC "locks" the drivetrain, which allows for a true mechanical connection between the transmission and the engine. In effect, this allows an automatic transmission to function like a manual transmission at certain speeds and engine loads, and eliminates all slipping from the transmission.

Hello my Check Engine light went on last week and the code p0740 popped up. This code refers to the TCC Solenoid on my transmission. And the entire lock up system. Well I took it to the dealership and they told me I need to replace my entire transmission. They also told me the fluid was black and burned. Well funny part about that was I had the fluid changed by them a month prior and when I ...
