HomeFort Thomas Independent Schools

For optimal results in cases of trauma, cold should be applied before significant edema and hemorrhage occur. Therapeutic cold is applied for 5-20 minutes, followed by a rest period of 30 minutes. For treatment of acute sprains/strains and postoperative care, application of cold is recommended for the first 24-48 hours.

Cold Applications (Cryotherapy) Why it is Recommended

With a crafty pen, Truman Capote wrote In Cold Blood to create a new genre and shock his audience. This lesson will help students examine Capote's manipulation of language as he forces his audience to take a different look at murderers and consider a different definition of nonfiction. His unique purpose leaves students an interesting text to consider.

What's the Purpose?: Examining a Cold Manipulation of---
