My son has 98 automatic 98 VW Jetta, 2.0 Liter engine which is now throwing a P103 code. We have just replaced the Mass Flow Sensor, cleaned the fuel injectors. Only hose leak is the hose from the brake booster to the intake manifold but don't know if this is causing the code. Intake manifold was also changed. Hope you can help.

SOLVED: P103 code in a 98 VW Jetta, 2.0 liter - Fixya

OBDII is the second generation of on-board diagnostics. It is likely that it is a 12v (12 valves in the cylinder head) if it is the US spec GTI of that year. That's rated at 172hp. It is possible that a previous put a newer 24v (4 valves per cylinder) engine in the vehicle. That engine is rated at 201hp in US configuration.
