Anatomy, in layman terms, is the study of the relationship and structure of human body parts. In other words, it gives us a clear picture of each of the different body parts and they relate to other parts.

# Get Free A Human

Physiology, on the other hand, studies the whole body as a unit and the function of each part.

## **General Anatomy and Physiology of a Human: TEAS ...**

Anatomy is the study of the structure and

# Get Free A Human

relationship between  
body parts. Physiology  
is the study of the  
function of body parts  
and the body as a whole.  
Some specializations  
within each of these  
sciences follow: Gross  
(macroscopic) anatomy  
is the study of body  
parts visible to the  
naked eye, such as the  
heart or bones.
