GRAVITY FEED AIRBRUSH: This method of paint delivery places the paint cup at the top of the airbrush. Gravity alone pulls the paint into the airbrush atomizing chamber. Gravity fed chambers allow for a lower working air pressure which can be an advantage when painting fine lines and details on miniature figures while avoiding over-spray. One possible drawback to the gravity fed style is the

With a double action airbrush, the further you pull the trigger, the more paint you will apply. 3) Practice moving the airbrush towards and away from the paper. The further you are from the surface, the paint will cover a larger area as well as being less defined. The opposite is true when you move closer. Airbrushing Techniques.

While you're decaling, detailing, or weathering your masterpiece, the thinner/cleaner is dissolving dried paint from the internals of your airbrush.

This takes time. I find it's better to allow the brush to sit in 1-2ml of thinner for 15 minutes than to shoot 15ml of thinner through the brush in 1 minute.
