A simple answer would be, "Programming is the act of instructing computers to carry out tasks." It is
often referred to as coding. So then, what is a computer program? A computer program is a sequence of
instructions that the computer executes.

A Gentler Introduction to Programming - freeCodeCamp.org
This course will teach you how to program in Scratch, an easy to use visual programming language.
More importantly, it will introduce you to the fundamental principles of computing and it will help you
think like a software engineer.

2.3. Introduction to Programming. A program is a set of instructions that tell the computer to do various things; sometimes the instruction it has to perform depends on what happened when it performed a previous instruction. This section gives an overview of the two main ways in which you can give these instructions, or "commands" as they are usually called.
