Taxonomy, the knowledge/remembering category only included three knowledge dimensions: factual (basic elements of knowledge), conceptual (the interrelationships between basic elements of knowledge), and procedural (the “how-to” part of knowledge). With Anderson and Krathwohl’s updates, they added a fourth knowledge dimension: metacognitive (knowledge of cognition and awareness of one’s own cognition).

Reflections on Bloom's and Anderson's/Krathwohl's taxonomy. The two taxonomies are extremely useful tools in building awareness of simple to more complex and challenging types of thinking/learning. The Bloom's taxonomy also “provides an excellent structure for planning, designing, assessing and evaluating and learning effectiveness” (Coffey, 2014).

Taxonomy Revised The

BLOOMS VS ANDERSON/KRATHWOHL TAXONOMY (REVISED) - EDF 5903 ...

Lorin Anderson was once a student of the famed Benjamin Bloom, and David Krathwohl was one of Bloom's partners as he devised his 1956 classic cognitive taxonomy. They called together a group of educational psychologists and educators to help them with the revisions. Their combined efforts led to a revised version of Bloom's famed taxonomy.

Taxonomy of Anderson et al (2001) and Bloom (1956).

This taxonomy is similar to many others in its hierarchical nature: simply put the categorization implies implying that the earlier level, as a general rule, must be mastered before the next level.

Taxonomy of Anderson et al (2001) and Bloom (1956) .

Bloom's Taxonomy was developed by Benjamin Bloom in 1956 and revised by Anderson and Krathwohl in 2001 as a framework for classifying learning based on different levels of cognitive rigor and complexity.

Krathwohl A Revision of Bloom's Taxonomy: An Overview

In Bloom's taxonomy, one has to find some ways to cut across different subject areas as the nature and contents of each subject area are different. Based on the theory of cognitive psychology, Anderson and Krathwohl came up with four
