API RP 551 Process Measurement, Second Edition. standard by American Petroleum Institute, 02/01/2016. View all product details

API RP 551 - Techstreet
The purpose of this specification is to define a minimum common set of specification requirements for the procurement of Electronic Transmitters - Pressure, Differential Pressure and Temperature in accordance with API RP 551, Second Edition, February 2016, Process Measurement, for application in the petroleum and natural gas industries.

Supplementary Specification to API Recommended Practice ...
API Recommended Practice 551, Process Measurement Instrumentation, 2nd edition This document provides recommendations about the selection and design of process measurement systems. Further, it supplies information on their implementation and commissioning.

API RP 551: 2016 [paper] - Kreisler Publications
The insertion length “ U ” is always equal to or larger than the immersion length “ R ” of a thermowell. API RP 551: TW installed perpendicular to the pipe wall should have a minimum immersion length of 2 inches. A general thumb rule is to use an immersion length equaling a minimum of 10 times the diameter of the thermowell.

Thermowell Insertion and Immersion Length ...
API RP 551 (reaffirmed in 2007, section 3.2.4) provides guidance with respect to a dynamic flow connection. Level measurement instruments should be isolatable for maintenance, dismantling/removal and calibration without affecting production, except when stopping the production for such activities is deemed acceptable.

API 550 P1, 1965 Edition, March 1965 - Manual on Installation of Refinery Instruments and Control Systems - Part 1 - Process Instrumentation and Control INTRODUCTION Successful instrumentation depends upon a workable arrangement which incorporates the simplest systems and devices that Will satisfy specified requirements.

API 550 P1 : Manual on Installation of Refinery ...
API was formed in 1919 as a standards-setting organization and is the global leader in convening subject matter experts across segments to establish, maintain, and distribute consensus standards for the oil and gas industry. In its first 100 years, API has developed more than 700 standards to enhance operational safety, environmental protection ...
