Application Architecture for WebSphere: A Practical ...

The application server for enterprises. IBM WebSphere® Application Server accelerates application delivery with a highly reliable Java Enterprise Edition (Java EE)-based runtime environment. It supports microservices and standards-based programming models designed to help you modernize at your own pace, gain greater visibility across workloads, analyze enterprise applications and advance your journey to Kubernetes.

WebSphere Application Server - Overview | IBM

Architecture. WebSphere Application Server (WAS) is built using open standards such as Java EE, XML, and Web Services. It runs on the following platforms: Windows, AIX, Linux, Solaris, IBM i and z/OS. Beginning with Version 6.1 and now into Version 9.0, the open standard specifications are aligned and common across all the platforms.
