River Variability and Complexity

Leonard is a geologist and civil engineer, specializing in hillslope and fluvial geomorphology. He was a Professor in ... and aquatic habitat; bedrock river channel erosion; and the influence of ...

SCHOOL OF ENVIRONMENTAL SCIENCE

Focuses on water management case studies on the scale of major river basins in North America and elsewhere ... Mathematical models will be formulated and applied to simulate water flow and chemical ...

Interdisciplinary MS Program in Water Resources

(1-0-3) EASC 615-3 Applied Geophysics Instrumentation, application and limitations of electrical, seismic, radar and gravity methods in the exploration for mineral resources and in engineering ...

Department of Earth Sciences

Debris flows are generally deposited en masse by cohesive freezing as the applied shear stress drops ... characteristics of the fluvial and submarine canyon-channel sediment-transfer zone, and ...

Submarine Fans and Canyon-Channel Systems: A Review of Processes, Products, and Models

He earned a PhD in Geology and Geophysics and an MS in Water Resources Engineering at the University of California, Berkeley, as well as a BS in Applied Science from New ... International Journal of ...

Dr. Leonard Sklar, PhD

We applied neutron texture analysis to gouge samples of the 1999 Chi-Chi earthquake in Taiwan to infer the stress state after the earthquake. Results indicate that the clay fabric within the ...
