particular group (lets say just for females or people younger than certain age). You can do this by using the conditional 'if', for example: ... the data you want. Then, in Stata type edit in the command line to open the data editor. Point the cursor to the first cell, then right-click, select ZPaste [. Saving data as Stata file .

Getting Started in Data Analysis using Stata
10 Listing data and basic command syntax Command syntax This chapter gives a basic lesson on Stata's command syntax while showing how to control the appearance of a data list. As we have seen throughout this manual, you have a choice between using menus and dialogs and using the Command window. Although many find the menus more natural and ...

Listing data and basic command syntax
Stata tries very hard to make all its commands work the same way. Spending a little time learning the syntax itself will make it much easier to use commands later. To carry out the examples in this section, you'll need to have created an SFS folder and downloaded the gss_sample data set as described in Managing Stata Files .
