If you really want to take that next step in controlling your photography, it is essential that you understand not only how to control aperture and shutter speed, but why you are controlling them. John Batdorff explores the modes of the Nikon D7000, including Program Mode, Shutter Priority Mode, Aperture Priority Mode, and Manual Mode.

P: Program Mode | Nikon D7000: The Professional Modes ...

M (Manual) Explanation: You choose both an aperture and an exposure time with the two command dials. The D7000 will only give you an indicator in the view finder if the resulting exposure is brighter or darker than the one measured by the camera. Note: The auto ISO sensitivity control is not deactivated automatically when choosing mode M as it would be appropriate for the purpose of full manual control.

Nikon D7000 AF Controls. bigger. The D7000's AF-Area modes (all, some, 3D, etc.) and AF-System modes (AF-S, AF-C and AF-A) are selected by pushing an unmarked button and holding it while spinning the front and rear control dials. This unmarked button is inside the simple AF-M lever.

Nikon D7000 Autofocus Settings - Ken Rockwell

To really take creative control with your Nikon D7000 DSLR, step up to one of these exposure modes, which enable you to adjust aperture (f-stop) to manipulate depth of field (the zone of sharp focus) and to adjust shutter speed to determine whether moving objects appear sharply focused or blurry. You also gain access to some features not available in the fully automatic modes, such as the option to adjust flash power and tweak white balance.

Nikon D7000 For Dummies Cheat Sheet - dummies

The lens depicted earlier is a good way of avoiding this obstacle though, but in general it is best to use manual focus, after you have already focussed on the subject using auto-focus. A combination of the two. You can do this by focusing automatically on the subject first, and once you are sure it is in focus, switch to manual focus.
