Bicycling Science by Whitt Frank Rowland Wilson David ...  
Cycling Science tours readers through a wide variety of topics, from tire rolling resistance and the difference between yield strength and ultimate strength, to the importance of aerodynamics and the impact that shaved legs have on speed. Each chapter explores a different subject--fundamentals, strength and stability, materials, power, aerodynamics, and the human factor--and is organized around a series of questions: What is the ideal frame shape?
