Secrets HL Topic 9: Plant biology. Welcome to Day Nine! Today's Focus will be on Topic 9: Plant Biology. This topic has 14% of occurance in the papers 1 and 2. Below you can find the subtopics of Page 12/43

Topic 9 and the percentage of how many times they appear on the exams from the last two years. 9.1 Transport in the xylem of plants

HL Topic 9:
Plant biology Studynova
Plant cells vary
Page 13/43

in size from about $7 \Phi m$ -the diameter of dividing cells at the tips of roots and shoots-to fiber cells a few micrometers wide but a meter or more in length. Most plant (and animal) cells are between Page 14/43

10-100 ⊕m and thus too small to be seen without magnification since human eyes have a resolving power (resolution) of about 100 ⊕m.

Page 39/43

A. ELEMENTS Almost everything around us can be broken down into simpler substances. These substances can be further broken down into other simpler substances. There is a point where substances Page 40/43

can no longer be broken

AP Biology Study Guide Some of the key tissues in plants are: vascular tissues, dermal tissues. ground tissues. In animals, vascular tissue Page 41/43

transports blood throughout the body, delivering oxygen, removing waste, creating Olympic athletes, and so on. In plants the tissues that transport things around the plant are called xylem and phloem.
