The check engine light is part of the onboard diagnostics (OBD) system in your BMW. What Does The Check Engine Light Mean When Illuminated? When you see the check engine light illuminated in your dash, it means your BMW has detected a problem within its OBD system. What Problems Can Trigger the Check Engine Light? Ranging from minor to major, a slew of things can trigger the check engine light to come on in your BMW, including (but not limited to): Loose gas cap

**Check Engine Light And Your BMW | BimmerShops**  
If your BMW check engine light (or service engine soon light) stays on, it means that the Onboard Diagnostic System ( also known as Digital Motor Electronics DME) has detected a problem with the emission system, engine, or transmission. BMW check engine light may come on due to something as simple as a loose gas cap, but it can also indicate an expensive engine or transmission problem.  
**Troubleshooting BMW Check Engine Light & Service Engine ---**  
A wide array of issues can cause a check engine light to come on, some more serious than others. Fortunately BMW of Fremont is here to help you figure out what might be wrong, and what your next steps should be. Below we have highlighted the most common causes of a check engine light. Loose Gas Cap: Your gas cap is loose, broken, or simply missing. Gas cap issues can reduce fuel pressure and allow fuel vapors to escape, reducing fuel economy and increasing harmful emissions.

**BMW Check Engine Light On? | Common Symptoms & What to Do Next**  
The check engine light is designed to monitor any defects and turn on when it detects a fault in your BMW's emissions system. Now, it is very important to understand that although it says check engine, the problem may not be with your engine. There are numerous reasons that could trigger a fault and cause the check engine light to turn on.  
**BMW Check Engine Light - What Does This Mean? - Cash Cars ---**  
Your check engine light is design to monitor and turn on when it detects a fault with your BMW's emissions system. While the light says "check engine" the reality is that it could be 100 different things that are triggering the fault causing the light to go on. Some of these issues are serious, others are not so serious.
