TEST & EVALUATION ENGINEERING Overview. As a test and evaluation engineer at Boeing, you can apply your skills on the ground, in the laboratory or in the air. You could flight-test an airplane to ensure the quietest environment, or conduct wind-tunnel testing for the next generation of fighters that protect nations around the world.

Test & Evaluation Engineering - Boeing
Flight engineers are essential to the development, safety and success of our products and solutions. Each day, they go above and beyond to meet our customers’ overall mission requirements—from initial vehicle concept definition through design, test, validation and in-service support. Your expertise in areas such as aerodynamics; propulsion; guidance, navigation and control (GNC); mass properties and configuration design skills will drive the future of aerospace.
