Boiler Water

Treatment

Guidelines;

Columbia Boiler

Co

The treatment
and conditioning
of boiler feed
water must
satisfy three
main objectives:

Online Library

Boiler Water

Continuous heat exchange;
Corrosion protection;
Production of high quality steam; External treatment is the reduction or removal of impurities from water outside the boiler. In general,

Online Library

Boiler Water

external treatment is used when the amount of one or more of the feed water impurities is too high to be tolerated by the boiler system in question.
