Bridging the digital divide is crucial if we want prosperity for all. The digital divide is the gulf that exists between those who have ready access to the Internet and those who do not. The digital divide diminishes quality of life, economic opportunity and social interaction for those without access.

With the pace of digital development rapidly accelerating, many organisations are currently considering how they can address digital skills shortages. The Open University's 2019 Bridging the Digital Divide report highlights the extent of digital skills gaps and the impact they are having on organisations and their employees. Currently, nine in 10 (88%) organisations admit they have a shortage of digital skills, which is already having a significant negative impact on
