The Buick V6, popularly referred to as the 3800 in its later incarnations, originally 198 cu in (3.2 L) and initially marketed as Fireball at its introduction in 1962, was a large V6 engine used by General Motors.The block is made of cast iron and all use two-valve-per-cylinder iron heads, actuated by pushrods.The engine, originally designed and manufactured in the United States, was also ...

Buick V6 engine - Wikipedia

The Buick V6 started its production life in the 1962 Buick Special. It was a 90 degree engine and its first displacement was 198 CID. It was dubbed the "Fireball". Buick had worked with the innovative 215 aluminum block V8 (later to be an Olds, then ultimately a Rover engine), but it was difficult to build and had its quirks.

Buick Parts Catalog

A V6 engine is a six-cylinder piston engine where the cylinders share a common crankshaft and are arranged in a V configuration.. The first V6 prototype engine was produced in 1906, however it took until 1950 for the first automotive V6 engine to reach production. In the past 20 to 30 years, the V6 layout has become the most common layout for six-cylinder automotive engines.

V6 engine - Wikipedia

Production of the renowned 3800 V6 engine was officially ended in August 2008, nearly 10 years beyond the automaker's original plan to cease 3800 engine production in 1999. That's quite a tribute to any pushrod motor, let alone one that started in life as a rough-running, odd-firing V6 in the '60s. Source: GM media and Engine Builder magazine
