## *Burnout | Psychology Today*

Burnout is a state of emotional, physical, and mental exhaustion caused by excessive and prolonged stress. It occurs when you feel overwhelmed, emotionally drained, and unable to meet constant demands. As the stress continues, you begin to lose the interest and motivation that led you to take on a certain role in the first place.

## *Burnout Prevention and Treatment - HelpGuide.org*

By Mayo Clinic Staff Job burnout is a special type of work-related stress — a state of physical or emotional exhaustion that also involves a sense of reduced accomplishment and loss of personal identity. "Burnout" isn't a medical diagnosis. Some experts think that other conditions, such as depression, are behind burnout.

## *Job burnout: How to spot it and take action - Mayo Clinic*

The term “burnout” is a relatively new term, first coined in 1974 by Herbert Freudenberger, in his book, *Burnout: The High Cost of High Achievement*. He originally defined burnout as, “the extinction of motivation or incentive, especially where one's devotion to a cause or relationship fails to produce the desired results.”

## *How to Tell You Have Reached the Point of Burnout*

Burnout was first seen largely in healthcare fields, where doctors and caregivers would burn out from overwork and stress. Today, it appears to be widespread. The shift to more service- and...

Burnout definition is - the cessation of operation usually of a jet or rocket engine; also : the point at which burnout occurs. How to use burnout in a sentence.

*Burnout | Definition of Burnout by Merriam-Webster*

Burnout was successful enough for a sequel Burnout 2: Point of Impact, released by Acclaim in 2002. Besides races, Burnout 2 introduced the series' signature "Crash mode", in which players would drive a car into a tableau of other cars and objects to try to do as much damage as possible. At this point in the series, the games were focused on driving on rural and country roads, and while the ...
