Solution We are to decide if the specific weight is an extensive or intensive property. Analysis The original specific weight is  $1 = W / V$  If we were to divide the system into two halves, each half weighs  $W/2$  and occupies a volume of  $V/2$ . The specific weight of one of these halves is  $= 1/2 / 2 W / V$  which is the same as the original specific weight.
