The General Electric CF34 is a civilian high-bypass turbofan developed by GE Aircraft Engines from its TF34 military engine. The CF34 is used on a number of business and regional jets, including the Bombardier CRJ series, the Embraer E-Jets, and the Chinese ARJ21. In 2012, there were 5,600 engines in service.

General Electric CF34 - Wikipedia

Bombardier CRJ200 Engine - GE CF34-3B1 The Bombardier CRJ200 engine is the GE CF34-3B1 (General Electric CF34-3B1). The CF34-3B1 engine was developed to upgrade the CRJ series engine (CRJ100) to a slightly better performing engine. The CRJ200 engine replaced the CRJ100s previous engine, the CF34-3A1.

Series airliner, CF34 engine performance provides economy and excellent reliability for high utilization operations comparable to large commercial turbofan engines powering narrowbody airliners. For corporate operators of the Bombardier Challenger* 604, 605 and 850, CF34 engine performance delivers high aircraft availability, increased travel comfort and confident intercontinental range. The ...

PowerPoint Presentation

The CF34 Engine Setting the standard for the regional aviation industry In 1992, GE's CF34 engine family helped launch a new era in regional jet aviation. More than 140 million flight hours and 113 million flight cycles later, it continues to set the standard for performance, durability and world-class reliability.
