*Chapter 10 Resource Waves Answer Key*  
Wave speed is equal to wavelength divided by period, or frequency multiplied by time. 3. As a source of sound moves toward a person, frequency and pitch increase, wavelength decreases, and wave speed stays the same. As a source of sound moves away from a person, wavelength increases, frequency and pitch decrease, and wave speed stays the same.

The Fast FileChapter Resource system allows you to conveniently file the resources you use most often. The Chapter 10 Resource Mastersinclude the core materials needed for Chapter 10. These materials include worksheets, extensions, and assessment options. The answers for these pages appear at the back of this booklet.  
*Chapter 10 Resource Masters*  
The same approximate equivalence holds at a world scale: the total wave energy resource is of the same order of magnitude as world electricity consumption (~ 2TW). The exploitable limit is probably at most about 10-25% of the resource; thus ocean wave energy is potentially a significant contributor to human energy demands, not a panacea.
