Chapter 14 - The Human Genome

The Human Genome Project (HGP) formally began in 1990 and was finished in 2003. The goal was to discover the DNA sequences for all of the 20,000-22,000 genes that are found in human beings. This knowledge is vital for research into genetic disorders and possible genetic solutions to these disorders.

Chapter 14 The Human

chromosomes are analyzed by taking a photograph of condensed chromosomes during mitosis - the chromosomes are then cut out of the photograph and grouped together in pairs - a picture of chromosomes arranged this way is known as a karyotype (See Fig 14-2 pg. 341)
