Chapter 16 Evolution of Populations 16:1 Genes and Variation Darwin's original ideas can now be under- stood in genetic terms. Beginning with variation, we now know that traits are con- trolled by genes and that many genes have at least two forms, or alleles.

Chapter 16 Evolution of Populations Summary
CHAPTER 16 EVOLUTION OF POPULATIONS A. Darwin's Ideas revisited - it was more than 50 years after Darwin started to develop his theory of evolution before biologists could determine how evolution takes place - about 1910, biologists realized that genes carry the information that determine traits
