~~Chapter 22 Respiratory System Part 2 – YouTube~~
Chapter 22 - Respiratory System Introduction to Respiratory System. Consists of the respiratory and conducting zones; Respiratory zone. Site of gas exchange Consists of bronchioles, alveolar ducts, and alveoli. Conducting zone . Provides rigid conduits for air to reach the sites of gas exchange Includes all other respiratory structures (e.g., nose, nasal cavity, pharynx, trachea)

Try this amazing Chapter 22: Respiratory System quiz which has been attempted 9471 times by avid quiz takers. Also explore over 100 similar quizzes in this category.

~~Chapter 22: Respiratory System – ProProfs Quiz~~
Carbon dioxide is exhaled and oxygen is inhaled through the respiratory system, which includes muscles to move air into and out of the lungs, passageways through which air moves, and microscopic gas exchange surfaces covered by capillaries. The circulatory system transports gases from the lungs to tissues throughout the body and vice versa.
