The cloning of green fluorescent protein (GFP), engineering of chimeric fusion ... In addition, FLIP has been used to characterize the kinetics of protein binding and release in living cells.

Studying protein dynamics in living cells

This article discusses the chemical properties of silicone systems ... The peroxide catalysts create free radical species of the methyl and vinyl that can then form covalent bonds. Figure 7
shows the ...

Silicones for Drug-Delivery Applications

Lectures and readings focus on bridges, railroads, power plants, steamboats, telegraph, highways, automobiles, aircraft, computers, and the microchip. Historical analysis provides a basis
for studying ...
