The Haynes manual is hardbound with about 270 slightly larger pages, 8-1/4 by 10-5/8 inches, compared to the paper-back Haynes 440 pages at 7 by 10-1/8 inches. Haynes makes up for the missing pages by using a 3-column layout compared to the 2 columns and larger print of Clymer.

### Haynes and Clymer Motorcycle Service Manual Comparison

Haynes manuals are based upon disassembling a brand new vehicle.. A Haynes manual then tells you that "re-assembly is the reverse of the above." Good luck with that! Sometimes the Haynes manual covers multiple year models and the pseudotechnical writer doesn't know about important design changes.

There are two kinds of service manuals out there: 1) The official Honda manual 2) Junk. The Haynes and Clymer manuals cover too many different models per book and contain too many errors (yes, genuine falsehoods!) to trust them or to really find what you need. The Honda manual covers one model. Your model.

Both Chilton and Haynes are quite popular with their ability to serve many manuals for different types of cars and motor etc. Haynes uses its mechanical terms in such a way that the newbies can easily access the information. On the other hand, Chilton needs a pre-requisite of basic knowledge about mechanical terms of the vehicle or engine parts.

This helps the writers for Clymer provide easy-to-follow instructions that allow the manual user to safely and efficiently service and repair their machine. This high level of detail sets Clymer apart from its factory "OEM" counterparts. In 2013, Haynes Publishing Group acquired Clymer repair manuals from Penton Media.

A manual uses a clutch, and clutches wear out. Plus, the human factor can make that happen far sooner than it really should. An automatic transmission doesn't have a clutch. It has what is known as a torque converter. In any car, you need to stop. With a manual, when you do, you just use the clutch to take it out of gear. An automatic can't do that.
