The Database Class : CodeIgniter User Guide

Displays the number of affected rows, when doing "write" type queries (insert, update, etc.). Note: In MySQL "DELETE FROM TABLE" returns 0 affected rows. The database class has a small hack that allows it to return the correct number of affected rows. By default this hack is enabled

but it can be ...

Query Helper Functions : CodeIgniter User Guide
CodeIgniter gives you access to a Query Builder class. This pattern allows information to be retrieved, inserted, and updated in your database with minimal scripting. In some cases, only one or two lines of code are necessary to perform a database action. CodeIgniter does not require that each database table be its own class file.
