*Codeigniter User Guide Session*
To access and initialize the session: $session = \Config\Services::session($config); The $config parameter is optional - your application configuration. If not provided, the services register will instantiate your default one. Once loaded, the Sessions library object will be available using: $session.

CodeIgniter User Guide Version 2.2.6: Table of Contents Page: CodeIgniter Home › User Guide Home › Session Class ... A session, as far as CodeIgniter is concerned, is simply an array containing the following information: The user's unique Session ID (this is a statistically random string with very strong entropy, hashed with MD5 for ...

*Session Class : CodeIgniter User Guide*
For the most part the session class will run unattended in the background, so simply initializing the class will cause it to read, create, and update sessions when necessary. To initialize the Session class manually in your controller constructor, use the $this->load->library () method: $this->load->library('session');
