Contemporary Japanese Buildings — Japan — e-architect

Japanese contemporary architecture is often admired for its simplicity, attention to detail, contemplative atmosphere, and palpable emphasis of material lightness and/or gravity (see my recent article " Learning from the 'Red' and 'White' Schools of Japanese Architecture " ).Though these characteristics are indeed common among recent projects designed by Japanese architects, they fail to ...

What Draws Us to Japanese Contemporary Architecture —

JA — The Japan Architect — was first published in June 1956 and was the only English language periodical that introduced Japanese architecture to an overseas audience. Since 1991 it has been published as a quarterly journal in both Japanese and English, expanding its readership both inside and outside of Japan. Today's JA showcases contemporary Japanese architecture with in-depth ...

Japanese architecture | History, Characteristics, & Facts —

Japanese modern architecture Modern architecture in Japan is divided into four periods. The first period was the period from 1955 to the 1964 Tokyo Olympic Games, and the society and organization were renewed. It was the time when society was beginning to stabilize, challenging not only architecture but everything.

All about Japanese modern architecture

Contemporary architecture is the architecture of the 21st century. No single style is dominant; contemporary architects are working in several different styles, from postmodernism and high-tech architecture to highly conceptual and expressive forms and designs, resembling sculpture on an enormous scale. The different styles and approaches have in common the use of very advanced technology and ...

Contemporary architecture — Wikipedia

Japanese architecture ( 日本建築, Nihon kenchiku) has been typified by wooden structures, elevated slightly off the ground, with tiled or thatched roofs. Sliding doors (fusuma) were used in place of walls, allowing the internal configuration of a space to be customized for different occasions.

Sky House was designed and built by the Japanese architect Kiyonori Kikutake (1928-2011) for himself in 1958. The project still stands out as a landmark to his long-lasting architectural convictions. A founding individual of the Metabolist movement, Kikutake established the framework for structural planning and new models of urban communities. His Sky-House is a high single volume that exemplifies both these essential standards on a local scale.

Kiyonori Kikutake: Sky House in Tokyo - Japan | ArchEyes

In 1958 he built his own house in Tokyo, the Skyhouse. This was a marked era in architecture Japan, by the influence of modernism and Le Corbusier especially. The influence of Le Corbusier reached Kikutake through the incursions of Japanese architects in the CIAM 8 (Hoddesdon, England, 1951) and successive congresses.
