CPOE is a computer application used to enter diagnostic and therapeutic patient care orders. Clinical decision support incorporated within the order process provides the physician with knowledge of potential medication errors and recent test results, and prompts for standard screening tests.

A Case Study on Computerized Physician Order Entry

Background. Computerized provider order entry (CPOE), especially when coupled with clinical decision support (CDS), can lead to improved safety, quality and efficiency of care, by preventing medication errors, avoiding redundant testing and promoting the use of evidence-based treatments, among other mechanisms [1-5].Although most studies and systematic reviews have suggested that CPOE results ...

Lessons learned from implementation of computerized ...

Analysis of medication errors suggests that prevention strategies targeting systems rather than individuals are most effective in reducing errors. 12 Computerized physician order entry (CPOE) and clinical decision support systems (CDSSs) are promising interventions that target the ordering stage of medications, where most medication errors and preventable ADEs occur. Despite growing public mandates and the obvious theoretical advantages of these systems, organizational adoption of CPOE and ...

Computerized Physician Order Entry (CPOE) is one of the leading features of an Electronic Health Records (EHR) system, as envisioned by the Office of the National Coordinator (ONC) for Health IT. It is a Meaningful Use criteria, both for hospital-based EHRs and for ambulatory EHRs – meaning that physicians must be able to demonstrate that at least 80% of their "orders" are captured electronically, and that it is the physician (and not a surrogate) who enters these orders.

Computerized Physician Order Entry (CPOE) | Practice Fusion

Implementation of an electronic health record (EHR) with computerized physician order entry (CPOE) can provide an important foundation for preventing harm and improving outcomes. Incentivized by the recent economic stimulus initiative, healthcare systems are implementing vendor-based EHR systems at an unprecedented rate.
