I some how managed to cut the wires going to the lights ...

When accelerating from red lights, all spark would stop, the engine would cut out, the yellow ENGINE light would come on on the dash, then spark

Access Free Cut The Engine Light Wire On 96

It would resume, and the bike would lurch forward. Sometimes it would repeat over and over - cutting out all together and lurching like I was flipping the kill switch back and forth.

Engine cutting out - suspect wiring harness. How do I ...

Access Free Cut The Engine Light Wire On 96

The warning light wire is usually the smallest of the wires in the multi-plug. To remove the wire from the multi-plug, first disconnect the plug from the alternator, then remove the clip at the rear of the plug holding the wires in. The wire can now be pulled out and touched to earth to test the circuit.
