The petrol-driven series has cast iron engine blocks and aluminum cylinder heads, and are of either SOHC or DOHC design, with belt driven heads. The E series engine was first presented in the summer of 1985, as the EB, a replacement for the two-cylinder AB engine used in Daihatsu's Kei cars until then. The engine

Hi, and thanks for visiting my page. I sell used parts for Daihatsu DM950D engines as well as other brands and models such as the Yanmar 3TN66 and Briggs Diesel parts. Since I run all of these engines myself, I can answer some of your questions. As you may already know, these are not very reliable engines.
