Computers to exchange data. The physical connection between networked computing devices is established using either cable media or wireless media.

## ~~Data Communication & Computer Network~~ Tutorialspoint

A computer network is a group of computer systems and other computing hardware devices that are linked through the communication channels. A Computer Network enables file sharing across the network. It helps the web information to traverse more easily and conveniently. It allows the sharing of software and operating systems on remote systems. Based on the area of networking, Computer Networks are of several types. Data Communication: When we communicate, we are sharing information.
