Data Mining in Agriculture (Springer Optimization and Its ...

Modern communication, sensing, and actuator technologies as well as methods from signal processing, pattern recognition, and data mining are increasingly applied in agriculture. Developments such as increased mobility, wireless networks, new environmental sensors, robots, and the computational cloud put the vision of a sustainable agriculture for anybody, anytime, and anywhere within reach.

Data mining in agriculture - CORE

Data mining can be used for predicting the future trends of agricultural processes. Data mining is the process that results in the discovery of new patterns in large data sets. The goal of the data mining process is to extract knowledge from an existing data set and transform it into a human understandable formation for advance use.

Data Mining in Agriculture is published by Springer and it is co-authored by Antonio Mucherino, Petraq Papajorgji and Panos Pardalos. A quick survey of the book can be found at this address . There are a few precision agriculture journals, such as Springer's Precision Agriculture or Elsevier's Computers and Electronics in Agriculture , but those are not exclusively devoted to data mining in agriculture.
