~~Digital Signal Processing (4th Edition) | Guide books~~

This chapter is a crash course in digital filter piloting. In the first section of this chapter we discuss technicalities relating to computing convolutions in the time domain. The second section discusses the circular convolution and how it can

be used to filter in the frequency domain; this is frequently the most efficient way to filter a signal.

~~Digital Filter Implementation — Digital Signal Processing ...~~

Digital signal processing is the use of digital processing, such as by computers or more specialized digital signal processors, to perform a wide variety of signal processing operations. The digital signals processed in this manner are a sequence of numbers that represent samples of a continuous variable in a domain such as
