We all know that security of information is important, more so when the information concerns banking and financial services, military and defence networks, and various government offices spread all ...

Quantum Key Distribution: The Future Of Secure Communication

CSE Core Courses is classified into six groups: Introduction to CSE, Computational Mathematics, High Performance Computing ... behind some algorithms, e.g., geometrical aspects and generalization, and ...

CSE Core Courses

Specifically, the soft computing techniques we develop draw inspiration ... Our research in this area includes work in concurrent and distributed evolutionary algorithms, neuroevolution (automated ...

Artificial Intelligence

The field requires broad training involving principles of computer ... developing novel models and algorithms for deep neural networks, federated, and distributed learning; and studying issues ...

Top 10 AI graduate degree programs

And one of the contributors to the two-volume "Parallel Distributed Processing ... are rapidly increasing with more computing power and more complex algorithms. That also

How Cognitive Science and Artificial Intelligence Are Intertwined

New ways of computing: Striving for innovation to make computing more user-friendly. Distributed computing opened a new area of study on Computer Networks & Security. Software engineering is the ...

Unravelling the Landscape of Computer Science Education
As more and more of the real-world economy shifts into the digital virtual world, the issue of the carbon impact of the metaverse and its various services will become more and more pressing.

The metaverse and the carbon economy

This course provides insight into multiprocessing operating systems including processor memory, peripheral, and file systems management in batch, timesharing, real time, and distributed systems ... in ...

Course Listing for Computer Science

The challenge of open source in the enterprise is not technical □ Cliff Saran's Enterprise blog Grid stability and the risk it poses to the retail sector and its datacentres □ Ahead in the ...
