It is an important book and a delight to read. " --Kay Redfield Jamison, Ph.D., Professor of Psychiatry, Johns Hopkins School of Medicine, and author of An Unquiet Mind .

DNA: The Story of the Genetic Revolution: 9780385351188 ...

What we know about DNA today can be largely credited to James Watson and Francis Crick, who discovered the structure of DNA in 1953. Despite there being many important and contributing discoveries both before and after their work, this is the year they discovered DNA ' s double helix, or spiraling, intertwined structure, which is fundamental to our current understanding of DNA as a whole.

History of DNA—What is DNA & How Was It Discovered ...

The story of the discovery of DNA begins in the 1800s... The molecule of life The molecule now known as DNA was first identified in the 1860s by a Swiss chemist called Johann Friedrich Miescher. Johann set out to research the key components of white blood cells?, part of our body ' s immune system.

The discovery of DNA | Stories | yourgenome.org

The History of DNA In 1953, James Watson and Francis Crick reported that they had discovered the structure of DNA (deoxyribonucleic acid) – the molecule that genes are made of. This discovery would transform the life sciences – from biochemistry and agriculture to medicine and genetics.
