The findings revealed in the second edition of this large book are partly from about 11,500 benign and malignant bone tumor cases handled by various doctors, around 8,400 malignant bone tumor cases of the National Cancer Institute, and some 9,500 consultation cases of Dr. Howard Dorfman, who is now retired but was co-editor of the first edition of this book that was published about 10 years ago.

Ever since I heard rumors that Dr. Dorfman was writing a textbook on bone tumors, I have been eagerly awaiting its publication. The wait has been worthwhile. This book, coauthored by Dr. Czerniak, is a real gem for those who are interested in skeletal neoplasms and pseudoneoplastic conditions.
