Emacs 26.3 is a maintenance release. New GPG key for GNU ELPA package signature checking. Emacs 26.2 Released Apr 12, 2019. Emacs 26.2 has a wide variety of new features, including: Emacs modules can now be built outside of the Emacs tree source. Emacs is now compliant with the latest version 11.0 of the Unicode Standard.

[GNU Emacs - GNU Project](#)

This is the basic reference to GNU Emacs, written by the guy who designed Emacs in the first place, so it doesn't get much more reliable than this. If you have Emacs, strictly speaking you don't need this, as Emacs comes with an online version of the manual which is probably more up to date than this book.

On OSX, I'm finding that emacs in Terminal won't display PDFs, but that GUI emacs will, the problem is that it takes a very long time to display a big file (like the emacs manual) and that the data, even though it looks searchable does not seem to work as the normal searches where the matching contents is highlighted.

[emacs as a PDF reader ? : emacs - reddit](#)

What does this text mean, in node Simple Lambda Expression Example of the Emacs Lisp manual: As these examples show, you can use a form with a lambda expression as its car to make local variables and give them values. In the old days of Lisp, this technique was the only way to bind and initialize local variables.

[help - emacs lisp manual - Emacs Stack Exchange](#)

This manual presumes considerable familiarity with the use of Emacs for editing; see The GNU Emacs Manual for this basic information. Generally speaking, the earlier chapters describe features of Emacs Lisp that have counterparts in many programming languages, and later chapters describe features that are peculiar to Emacs Lisp or relate specifically to editing.
