~~Management of Eating Disorders in the Emergency Department~~

Such situations meet the working definition of an "emergency," a rapidly evolving disorder (hours to days) in which the failure to diagnose and treat may lead to significant morbidity or mortality. 1 This review is divided into 2 parts based on phenomenology, hypokinetic and hyperkinetic disorders, and it discusses rapidly evolving situations that require emergency intervention. A number of the disorders discussed are rare.

~~Movement Disorders Emergencies Part 1: Hypokinetic ...~~

Introduction: Patient agitation represents a significant challenge in the emergency department (ED), a setting in which medical staff are working under pressure dealing with a diverse range of medical emergencies. The potential for escalation into aggressive behavior, putting patients, staff, and others at risk, makes it imperative to address agitated behavior rapidly and efficiently.

~~Managing Agitation Associated with Schizophrenia and ...~~

This paper examines the issues of disorder, emergency, and conflict and their management in a rule of law-based framework, with illustration from the aftermath of the September 11, 2001 attacks on the United States and the war in Iraq. Noting that the promotion of the rule of law by state institutions has decreased in recent years, the paper postulates that the manifestation of violence as a result of sociopolitical unrest and armed conflict, whether domestic or international, is an ...

~~The Pitfalls of Lawlessness: Disorder, Emergencies, and ...~~

As the Global Preparedness Monitoring Board (GPMB) noted last year, pathogens . thrive in disruption and disorder. 1 COVID-19 has proven the point. Where sufficient resources, cooperation, and organization were applied, it was slowed.
