The solution to each problem assumed that you already know the basic concepts and principles in Engineering Mechanics.

Engineering Mechanics is divided into two major parts, namely Statics and Dynamics. Statics is primarily concerned to system of forces applied to body at rest. It includes the following topics: resultant of force system; equilibrium of force system; cables; friction; trusses; frames; centroid; center of gravity; and moment of inertia.

Epub Library What Is Difference Between Static And Dynamics In
in mechanics static is referred to motion velocity which is either
zero or constant and dynamics is motion in which there is a
particular acceleration so in dynamics velocity is always changing
