As you're reading this sentence, the cells in your brain, called neurons, are sending rapid-fire electrical signals between each other, transmitting information. They're doing so via tiny, specialized ...

Enzymes Used to Change How Brain Cells Communicate With Each Other

Researchers have unmasked a component of the cell death process that could play a vital role in a better infection-fighting strategy.

Scientists reveal function of cell death enzyme capsase-7

This project needs to be supervised by an adult or professional because ethanol, a volatile substance is extracted from starch plants. To identify a starch plant that produces the largest quantity of ...

Which Starch Plant Produces the Most Fuel?

The COVID-19 pandemic forced teachers across the globe to embrace remote learning. Although adapting existing materials was relatively easy for lecture-based courses that revolved around theory, ...

Implementing remote laboratory activity to teach students about enzyme kinetics

Researchers demonstrate the implementation of a remote laboratory activity to teach students about enzyme kinetics.

Bioengineering team develops a remote lab to teach enzyme kinetics

A new study demonstrates the possibility of changing the identity of synapses between neurons, both in vitro and in vivo, through enzymatic means. The results have implications for treating brain ...
