Students model Hardy Weinberg equilibrium using  
Teddy Graham crackers. Playing the role of a  
monster, record data on how many of each type of  
teddy graham is in the population. There are two  
types: happy bears and sad bears. Monsters prefer  
the happy bears and will eat those first.

TEACHER'S GUIDE - LAB: Natural Selection with Teddy Grahams. Objectives The student will be able to: recognize that evolution is the change in allele frequencies in a population across generations; understand how natural selection can result in a change in allele frequencies over time;

### **TEACHER'S GUIDE**

Natural Selection with Teddy Grahams. Procedure: Read the story and follow instructions. Obtain a population of . 8 bears, and record in table 1 the number of each: The Total Population, the Happy Bears, and the Sad Bears. Eat three Happy Bears. If you don't have three Happy Bears, then eat the difference in Sad Bears.

LAB: Natural Selection with Teddy Grahams

BACKGROUND INFORMATION: The phrase "survival of the fittest" is often used to describe who wins in the struggle for life and is sometimes translated into the phrase "only the strong survive." Realistically, the phrase should read "survival of the best adapted."

This better explains what Darwin had in mind when he identified natural ...
