There are 3 main types of automatic fire alarm system: conventional, wireless and addressable. Conventional Fire Alarm. This type of fire alarm is what most people imagine when they think of a fire alarm. It divides your premises into broad zones, and in the event of an alert, the fire alarm panel identifies the zone, but not the precise area

Fire alarms-Property management | London Fire Brigade

A smoke alarm is an essential part of any home or workplace and having one significantly decreases your chances of dying in a fire. A smoke detector with an alarm will quickly identify smoke which would indicate that there is a fire nearby, and gives off a loud signal to warn of danger, giving you enough time to escape and call emergency services.
