In 1905, Albert Einstein introduced the
Theory of Special Relativity, which
said that if the speed of light is

There are really two Einstein theories

File Type PDF From Special Relativity To Feynman

of relativity. This chapter is concerned with the Special Theory of Relativity, which dates from 1905. In 1915 Einstein published an additional theory, called the General Theory of Relativity. This latter theory deals with the extension of the Special Theory to the case of the law of gravitation; we

Feynman also shows that all other variables we can possibly calculate in the S reference frame, such as the momentum of the charged particle after the force has acted on it for some time all turn out to be what we'd expect them to be according to special relativity.
