## Gec Cdg Relay Manual

Type CDG 21 relay is a single pole type CDG 11 relay with a high-set instantaneous unit. Type CDG 31 is a triple pole version of the type CDG 11 with three overcurrent units or two overcurrent units and one earthfault unit in the centre. Type CDG 61 relay is a triple pole version of type CDG 21 relay.

The relay uses solid state techniques, each measuring board utilising a micro- computer as a basic circuit element. The current measurement, whether performed on a single phase or polyphase input, is performed via an analogue-to-digital converter.

A non-directional heavily damped induction disc relay, which has an adjustable inverse time/current characteristic with a definite minimum time. CDG 21 and CDG 61 are 1 & 3 pole versions of CDG11 with highset instantaneous unit respectively. The relay has a high torque movement combined with low burden and low overshoot.

them. RE: Relay Curves GEC CDG-23 peterb (Electrical) 30 Jul 01 11:22. You could try the Alstom website - [www.tde.alstom.com](http://www.tde.alstom.com); it doesn't have the CDG relay listed, but you can get info on say the KCGG series ...

---

Relay Curves GEC CDG-23 - Electric motors & generators ...  
CAG14 relay is applied for high impedance restricted earth fault protection of generator, transformer, reactor and bus bars. It is also used with a follower timer for time delayed earth fault protection. Other applications include capacitor bank unbalance protection, generator inter turn fault protection etc.
