Geomatics! It's an incredible field that allows us to understand (measure + model + represent) the earth (inside + out), as well as all the amazing stuff us humans have ever found or built - on, in, and around it. « Whatever. Can you help me? ...
Welcome to spatial.engineer!

Spatial Engineer - The Spatial Engineer
Geomatics Engineering is concerned with the development of new technologies for the acquisition, analysis, management and distribution of geospatial data and with the creation and implementation of new decision-making tools and applications based on the geospatial information. It involves the design and development of new software tools and algorithms to analyse, interpret and graphically represent the acquired data in formats useful to the end-users.

Earth and Space Science and Engineering | BEng: Geomatics ...
Geomatics Engineering also involves aspects of Computer Engineering, Software Engineering and Civil Engineering. Geomatics is a field that incorporates several others such as the older field of land surveying engineering along with many other aspects of spatial data management ranging from data science and cartography to geography. Following the advanced developments in digital data processing, the nature of the tasks required of the professional land surveyor has evolved and the term ...
